

AI Tools & Productivity

Supercharge your workflow with the right AI tools

Quick Reference Cheat Sheet • AILearnHub.IO

TOP AI PRODUCTIVITY TOOLS BY CATEGORY

Writing & Editing	ChatGPT, Claude, Jasper	Emails, reports, content
Meeting Notes	Otter.ai, Fireflies, Fathom	Auto-transcription, summaries
Research	Perplexity AI, Elicit, Consensus	Fast research with citations
Presentations	Gamma, Beautiful.ai, Tome	AI-generated slide decks
Image Creation	Midjourney, DALL-E, Adobe Firefly	Marketing visuals, thumbnails
Code	GitHub Copilot, Cursor, Replit	Coding & automation
Automation	Zapier AI, Make, n8n	No-code workflow automation
Spreadsheets	Rows AI, Julius, Excel Copilot	Data analysis, formulas
Video	Runway, HeyGen, Descript	Video creation & editing
Customer Support	Intercom AI, Zendesk AI, Tidio	Chatbots, ticket routing

DAILY AI PRODUCTIVITY WORKFLOW

Morning (15 min)	Use Otter.ai or Fathom to review yesterday's meeting notes. Use ChatGPT to draft your top 3 priorities for the day.
Email (10 min)	Use ChatGPT or Copilot to draft email replies. Reduce 30-min inbox time to under 10 minutes.
Research (5 min)	Use Perplexity AI instead of Google for quick research — get cited answers in seconds, not pages to scroll.
Writing (ongoing)	Start every document with an AI draft. Edit and refine — much faster than starting from a blank page.
Meetings	Let Otter.ai run in the background. It captures action items so you can focus on the conversation.
End of Day	Ask ChatGPT to turn your rough meeting notes into a clean summary email for your team.

TIME-SAVING AI PROMPTS

Email reply	"Read this email and write a professional reply in under 100 words: [paste email]"
--------------------	--

Meeting agenda	"Create a 30-minute meeting agenda for [topic] with 4 agenda items and time allocations."
Status update	"Turn these bullet notes into a polished team status update: [paste notes]"
Document summary	"Summarise this document in 5 key takeaways for a busy executive: [paste content]"
Task list	"I have these tasks: [list]. Prioritise them by urgency and importance using the Eisenhower matrix."
Job ad analysis	"Read this job description and list the top 5 skills the employer wants most: [paste JD]"
Report draft	"Write a one-page report on [topic] with: Executive Summary, Key Findings, and Next Steps."
Process automation	"Describe how I could automate this task using AI tools: [describe task]"

Pro Tip: The average knowledge worker saves 2-3 hours per day using AI tools. Start with one tool in one area, master it, then expand.

ROI CALCULATOR — QUICK REFERENCE

Your hourly rate	Estimate your value per hour (salary ÷ 2,000 working hours/year)
Hours saved/day with AI	Average: 1-3 hours for knowledge workers using AI actively
Annual ROI estimate	2 hrs/day × 250 work days × \$50/hr = \$25,000 in reclaimed time/year
Tool cost reference	ChatGPT Plus: \$20/mo • Claude Pro: \$20/mo • Copilot: \$30/mo
