AI SUBJECT LINE FORMULAS THAT WORK

Curiosity Gap	"The #1 mistake [your audience] make with [topic]..."
Number + Benefit	"7 ways to [benefit] in [timeframe]"
Personalisation	"[First name], here's your [benefit/gift/result]"
Urgency	"Only 3 hours left — [offer expires tonight]"
Question	"Are you making this [topic] mistake?"
Social Proof	"[X] people already did this — here's what happened"
Direct Benefit	"How to [result] without [pain point]"
Exclusive/VIP	"[First name], you're invited (not everyone got this)"

5-EMAIL WELCOME SEQUENCE (AI PROMPTS)

Email 1 — Welcome	"Write a warm welcome email for new subscribers of [brand]. Include: welcome message, what they can expect, and one quick win they can act on today."
Email 2 — Story	"Write a brand story email for [brand]. Share our founding story, the problem we solve, and why we're different. End with a soft CTA to read our blog."
Email 3 — Value	"Write an educational email teaching [audience] about [key topic]. Include 3 actionable tips and link to our best resource."
Email 4 — Social Proof	"Write a testimonial-based email featuring 2-3 customer success stories for [product/service]. Include specific results and a CTA to [product page]."
Email 5 — Offer	"Write a sales email for [product]. Highlight: the problem, our solution, 3 key benefits, pricing, and a urgency-based CTA. Under 200 words."

KEY EMAIL METRICS — BENCHMARKS

Open Rate	21–25%	30%+ with AI subject lines
Click-Through Rate	2.5–3%	5%+ with AI-personalised CTAs
Conversion Rate	1–2%	3–5% with optimised sequences
Unsubscribe Rate	0.1–0.5%	Under 0.2% (segment better)
Bounce Rate	Under 2%	Under 1% with list hygiene

Pro Tip: Use ChatGPT to generate 5 subject line variations for every email. A/B test them and let data pick the winner. Over 3 months this alone can lift open rates by 20-35%.
